### **DETAILED ACTION**

1. Claims 1-18 are pending.
2. This action is in response to the Remarks filed August 16, 2004. In the response, Group I, claims 1-11 is elected with traverse.

#### Response to the Restriction Requirement

Applicants have elected Group I, claims 1-11. Applicants traverse the restriction requirement. The traversal is based upon two criteria for a proper restriction which include: a) independent or distinct as claimed and 2) serious burden on the Office. Applicants state there will not be a serious burden on the Office to examine the entirety of the application. Applicants state a search of the invention of Group I will inevitably require searching the same art as the invention of claim 12 (Group II).

It is the Examiner's position:

- Based upon Applicant's remarks, the inventions of Group II and I will be examined together.
- Claims 1-12 will be examined as Group I.

Applicants state the examination of Group I will therefore inevitably require search the subject matter of Groups I-III. It is believed that examining the subject matter of Groups I-III would not pose a serious burden. In addition, examining Groups I-III together will result in the economies of the Patent Office as well as the Applicant.

It is the Examiner's position:

Art Unit: 1625

- The compounds of claims 13-18 are chemical intermediates. The prior art search for the process claims (claims 1) is different from the search of the intermediate compounds.
- The final compounds and intermediate compounds are patentably distinct.
- The serious burden to the Office would be searching more than a single inventive concept in a single patent application.
- As such, the restriction is deemed proper.
- Accordingly, applicants and the Examiner affirm the election of Group I wherein the claims 1-12 is the elected inventions.
- Claims 13-18 are withdrawn from consideration.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-12 are rejected under 35 U.S.C. 102(e) as being clearly by anticipated by Harris et al (Reference A).

The instantly claimed invention is disclosed. At pages 2-4, see scheme I.
